## EDUCATION

B.Tech in Artificial Intelligence and Data Science  
(2nd Year)  
Akshaya College of Engineering and Technology,  
Coimbatore  
CGPA: 8.23 (up to 3rd Semester)

## CERTIFICATE

- Mathematics for Data Science,  
Machine Learning and  
Generative AI – Udemy |  
Instructor: Krish Naik
- Design and Analysis of  
Algorithms – NPTEL (IIT  
Madras) | Elite (8-week  
course)

## SKILL

Programming language:

- python
- java(Basic)
- Sql

AI & Machine Learning:

- Machine Learning  
(Fundamentals)
- Prompt Engineering (Basic)
- LLM Integration (OpenAI-  
compatible APIs)

Data Analysis:

- Exploratory Data Analysis  
(EDA) using Pandas, NumPy,  
Matplotlib, Seaborn

Frameworks & Tools:

- Flask (Basic), Streamlit (Basic)
- OpenAI SDK, Gemini API,  
OpenRouter

Developer Tools:

- VS Code, Cursor

## WORKSHOP ATTENDED:

- "Decoding Intelligence AI for  
starters" at Karpagam college  
of engineering
- "LLM integration Using python"  
at Rathinam college of  
engineering,coimbatore

## PAPER PRESENTED:

- Presented a paper "Ai medical  
bot" at Hindhusthan college of  
engineering, coimbatore.

## ACHIEVEMENT

- Secured First Prize in a 12-hour hackathon at  
Akshaya College for creating a medical  
chatbot designed to eliminate hallucinations  
and provide highly accurate information.
- Achieved a 2-Star Gold Badge in SQL on  
HackerRank, demonstrating proficiency in complex  
database querying and data manipulation.

# Thirumaran V

## Aspiring AI Engineer

## PROFILE

Aspiring AI Developer with hands-on experience in building LLM-based applications, multi-model AI systems, and data pipelines. Skilled in Python, API integration, and prompt engineering,SQL with a strong focus on real-world problem solving. Currently pursuing B.Tech in AI & DS and seeking an internship to apply and grow in AI development.

## PROJECTS

### LLM Radar – AI News Summarizer

- Built an AI-powered system to extract and summarize technical insights from AI/LLM blogs into structured reports
- Implemented web scraping using BeautifulSoup and requests to collect and clean raw web data
- Integrated Gemini API via an OpenAI-compatible SDK for LLM-based analysis and insight extraction
- Designed a processing pipeline to convert unstructured content into model-wise technical summaries for engineers
- Applied one-shot prompting to guide LLMs for accurate, structured output generation
- Managed project dependencies using uv for efficient virtual environment and package management
- Filtered irrelevant content to generate concise, decision-ready intelligence reports

### Data Warehouse Implementation – Medallion Architecture

- Designed and implemented a modern data warehouse using the Medallion Architecture (Bronze, Silver, Gold layers)
- Built data pipelines to transform raw data from multiple sources (CRM, ERP) into analytics-ready datasets
- Performed data cleaning, transformation, and standardization using T-SQL in SQL Server
- Developed fact and dimension tables using star schema modeling for efficient reporting
- Established relational mapping using primary and foreign keys to integrate disparate data sources
- Created SQL views to build a semantic layer for business intelligence tools like Power BI and Excel
- Implemented schema isolation and data quality checks to ensure reliability and consistency

### Multi-Model LLM Interview Simulator

- Developed a multi-agent AI system simulating real-time interview conversations between LLMs (HR ↔ Candidate)
- Integrated multiple LLM providers (Gemini, OpenRouter/DeepSeek) using an OpenAI-compatible SDK
- Designed role-based prompt engineering to control behavior, tone, and structured responses
- Implemented context-aware conversation management using message history for coherent multi-turn dialogue
- Handled API rate limits and quota constraints using optimized request scheduling and delays
- Built a flexible system to manage model availability and fallback strategies across free-tier APIs
- Debugged and resolved real-world integration issues including API errors, incorrect endpoints, and configuration bugs
